PROFESSIONAL SUMMARY

A world-class, premium developer portfolio website with a cybernetic tactile design system.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, PHP
Frontend:	Next.js 15, React Native, Tailwind CSS, shadcn/ui, Framer Motion, HTML/CSS
Backend:	Node.js, Express.js, Laravel, Supabase, Firebase
AI & ML:	TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, Data Cleaning
Automation:	n8n, Zapier, Make.com
Design:	Figma, Photoshop, Illustrator, After Effects
Platforms:	WordPress, Wix, Go High Level, HubSpot CRM, Telegram API, Brevo
Other:	UI/UX Principles, Funnel Design, Lead Generation

PROFESSIONAL EXPERIENCE

Mobile & Frontend Engineer

AwoofHub

April 2026 – Present

Abuja, Nigeria

- Technologies Utilized:** React Native, Expo, Next.js
- Translated UI/UX designs into reusable, production-ready components for both the mobile app and marketing website, maintaining strict adherence to the design system
 - Built custom hooks, TypeScript types, and service layers powering data flow across the app and website; integrated REST APIs with the backend team
 - Shipped the product's marketing website from design handoff to launch, contributing to both frontend implementation and structure
 - Collaborated directly with the team lead and founder on architecture decisions, product direction, and design strategy

Software Engineering Intern

NASRDA

April 2025 – September 2025

Abuja, Nigeria

- Technologies Utilized:** Python, NumPy, Pandas, Power BI, Linux, Docker, WSL2, JWT, Networking
- Built hands-on networking skills using WSL2, Docker, and virtual machines — configuring DNS resolution, static IPs, and protocol troubleshooting (dig, nslookup, traceroute)
 - Developed a lightweight internal dashboard using Power BI to visualize processing status for a housing dataset (Mexico real estate data, sourced from Kaggle)
 - Secured API endpoints with token-based authentication (JWT) and applied cybersecurity fundamentals — including access control and secure data handling — to user authentication flows, implementing role-based access control (RBAC) for admin vs. regular users
 - Worked across data science, embedded systems, and networking teams in a multidisciplinary aerospace research environment

Frontend Engineer Intern

Myltura

January 2024 – May 2024

Abuja, Nigeria

- Technologies Utilized:** React, Next.js, HTML, CSS, JavaScript
- Built and maintained production frontend features using React and Next.js, optimizing component load times
 - Contributed to a healthcare platform for managing patient consultations and prescriptions
 - Collaborated within an agile team, participating in sprint planning and daily standups
 - Completed 50+ tickets within the first 2 months of hire, demonstrating fast ramp-up and consistent delivery velocity

Fullstack & Automation Freelancer

Fiverr / Contracts

2023 – Present

Remote

Technologies Utilized: *Next.js, WordPress, Wix, GoHighLevel, n8n, Zapier, Ahrefs, Google Search Console*

- Delivered 30+ client projects spanning custom web architecture, automation pipelines, and conversion funnels
- Engineered lead-generation funnels and reliable CRM integrations using GoHighLevel, n8n, and Zapier
- Designed and launched responsive websites for international clients using custom code, WordPress, and Wix
- Managed end-to-end client delivery independently — from initial wireframes to final production deployment
- Built websites optimized for Core Web Vitals, minimizing load times and improving performance scores
- Increased visibility and traffic for client websites across diverse niches through technical and content optimization
- Conducted SEO audits using PageSpeed Insights, identifying and resolving performance bottlenecks
- Applied web and funnel design principles to improve user attention retention and engagement

SELECTED PROJECTS

Rebid

Technologies: *React Native, Expo, Supabase, Express.js, React*

A mobile bidding platform where users post projects and receive competitive bids within a set time window, awarding the contract to the highest bidder.

TyphoidGuard

Technologies: *Next.js, TypeScript, Python, TensorFlow, Scikit-learn*

An advanced clinical triage simulator powered by a custom-trained Neural Network (Multi-Layer Perceptron) running entirely client-side with zero runtime dependencies.

AcadExpub

Technologies: *Next.js, TypeScript, Tailwind CSS, shadcn/ui, Firebase*

An academic publishing platform with role-based authentication where educators submit and manage course materials, while students access and reference content through a dedicated portal.

Customer Onboarding Automation

Technologies: *n8n, HubSpot CRM, Telegram API, JSON Webhooks, OAuth2, JavaScript*

A robust, enterprise-grade customer onboarding and CRM synchronization pipeline built on n8n. This workflow automates the entire post-signup customer journey: validating incoming webhooks, syncing multi-dimensional customer profiles into HubSpot CRM, alerting account teams in real-time via Telegram, and executing a progress-tracked, psychology-backed welcome and onboarding document delivery sequence.

Amy Fabrics E-commerce Store

Technologies: *Next.js, TypeScript, Tailwind CSS, shadcn/ui*

Production-ready e-commerce frontend template showcasing modern UI patterns, responsive design, and clean component architecture.

FitTrack PWA

Technologies: *Next.js 15, TypeScript, Tailwind CSS, PWA, Framer Motion, WebRTC, Workbox*

A high-performance, offline-first Next.js 15 PWA integrating live device sensors, dynamic API caching, and real-time nutrition calculators in a stunning glassmorphic interface.

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science

University of Abuja

2023 – Present

Abuja, Nigeria
