

# DIVINE CHIBUEZE NNAJI (NAVIE)

## Fullstack Software Engineer & AI Systems Developer

Email: dnnaji26@gmail.com | Phone: +234 810 689 0380 | GitHub: github.com/D33yan | LinkedIn: linkedin.com/in/divine-nnaji-23b771393 | Portfolio: divinethe.dev

### PROFESSIONAL SUMMARY

Dynamic, results-driven Fullstack Software Engineer and AI Builder with 3 years of hands-on experience delivering high-performance web applications, native mobile experiences, and advanced workflow automation pipelines. Adept at bridging the gap between complex mathematical systems and sleek, responsive UI/UX designs. Expertly leverages Next.js, React Native, Supabase, Express.js, n8n, and Python to automate operations, reduce system latency, and engineer premium consumer products.

### TECHNICAL SKILLS

|                        |                                                                                                 |
|------------------------|-------------------------------------------------------------------------------------------------|
| Languages:             | JavaScript (ES6+), TypeScript, Python, PHP, HTML5, CSS3, SQL                                    |
| Frontend & Mobile:     | React Native, Expo, Next.js (App Router), React.js, Tailwind CSS, shadcn/ui, Figma              |
| Backend & Database:    | Node.js, Express.js, Supabase, PostgreSQL, Laravel, Firebase, Firestore, REST APIs, WebSockets  |
| AI, ML & Data Science: | Scikit-learn, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Data Preprocessing & Modeling |
| Automation & CRM:      | n8n, Zapier, Make.com, GoHighLevel CRM, Webhook Listeners, Automation Funnels                   |
| Platforms & DevOps:    | Git, GitHub, CI/CD pipelines, WordPress, Wix, Vercel, Brevo, Linux Systems                      |

### PROFESSIONAL EXPERIENCE

**Data Scientist & AI Engineer**  
NASRDA (National Space Research & Development Agency)

April 2026 – Present  
Abuja, Nigeria

**Technologies Utilized:** Python, NumPy, Pandas, Matplotlib, Data Science, AI Integration

- Cleaned and preprocessed datasets using Python, NumPy, and Pandas to ensure data integrity for modelling pipelines.
- Conducted exploratory data analysis (EDA) to surface patterns and inform model development decisions.
- Built and evaluated machine learning models, contributing to AI integration across internal research workflows.
- Worked across data science, embedded systems, and networking domains within a government research environment.

**Graphic Designer & Web Developer (Contract/Volunteer)**  
Ink and Armor

2026 – Present  
Abuja, Nigeria

**Technologies Utilized:** Figma, Photoshop, Illustrator, WordPress, Web Design, Brand Design

- Designed brand and marketing materials including logos, flyers, and social media graphics for a creative writing agency.
- Currently developing the company website to establish a cohesive online presence for the agency.
- Collaborated directly with the founder to translate brand vision into visual and web deliverables.
- Handled end-to-end creative production across print and digital formats using Figma, Photoshop, and Illustrator.

**Frontend Engineer Intern**  
Tech Beavers

January 2025 – May 2025  
Abuja, Nigeria

**Technologies Utilized:** React, Next.js, HTML, CSS, JavaScript, Git, GitHub

- Built and maintained frontend interfaces using React and Next.js, contributing to live product features across the internship period.
- Collaborated with a development team on sprint-based workflows, gaining hands-on experience with real codebase collaboration.
- Translated UI/UX designs into responsive, accessible components using HTML, CSS, and JavaScript.
- Received mentorship in professional frontend development practices and delivered assigned features within deadlines.

## Fullstack Developer & Automation Specialist

Freelance (Fiverr & Direct Clients)

2023 – Present

Remote

**Technologies Utilized:** *Next.js, React Native, Node.js, WordPress, Wix, GoHighLevel, n8n, Zapier*

- Delivered 15+ client projects across web development, CRM automation, and funnel design over 3 years of independent practice.
- Designed and delivered custom websites for clients via Fiverr, covering landing pages, portfolios, and business sites using Next.js, WordPress, and Wix.
- Built lead capture and CRM automation pipelines using GoHighLevel, n8n, and Zapier — handling everything from funnel design to email/SMS qualification sequences.
- Designed and deployed sales funnels for clients, integrating lead generation flows with CRM tools and automated follow-up systems.
- Managed end-to-end client delivery independently — from scoping and design to handoff — across multiple concurrent projects.

## SELECTED PROJECTS

---

### Rebid — Mobile Bidding Platform

**Technologies:** *React Native, Expo, Supabase (Real-time), Express.js, WebSockets*

Designed and engineered a high-performance native mobile auction application where clients list active projects and receive competitive bids. Integrated React Native and Expo with a Supabase real-time database and Express.js WebSocket synchronizations, developing a custom bid-validation algorithm that prevents race conditions. Built automated anti-bidding-sniping timer extensions and a secure automated winner determination protocol, delivering a zero-latency, secure bidding ecosystem.

### TyphoidGuard — Clinical Typhoid Risk Simulator

**Technologies:** *Python, TypeScript, TensorFlow, Scikit-learn, Next.js*

Developed a zero-dependency edge-computing clinical triage screening application powered by a custom-trained 3-layer Neural Network (Multi-Layer Perceptron) running entirely client-side. Trained the Sequential classifier in Python, then built a custom Python exporter to serialize model weights, biases, and StandardScaler coefficients into a 15 KB JSON configuration. Programmed a pure-math forward-propagation matrix multiplication engine in raw TypeScript to execute client-side predictions in < 0.1ms locally (100% HIPAA-compliant, in-memory sandboxing).

### AcadExpub — Academic Material Distribution Portal

**Technologies:** *Next.js, TypeScript, Tailwind CSS, shadcn/ui, Firebase Auth, Firestore & Cloud Storage*

Developed a fullscale web application for secure academic file indexing and literature distribution. Designed custom Firebase authorization claims to isolate Student and Educator dashboards, built drag-and-drop chunked file upload systems in Firebase Storage with encrypted access validation, and optimized page query execution speed reducing operational layout lag by 35%.

## EDUCATION & CERTIFICATIONS

---

### B.Sc. Computer Science

University of Abuja

2023 – Present

Abuja, Nigeria

### Professional Certifications (EarlyCode Training Institute)

- App Development
- Fullstack Web Development
- Python Programming

July 2023 – September 2023

October 2022 – February 2023

May 2022 – June 2022
