PROFESSIONAL SUMMARY

Full-Stack Software Engineer experienced in building and shipping production web and mobile applications across freelance, startup, healthcare, and public-sector environments. Skilled in React, Next.js, React Native, Node.js, REST APIs, databases, and authentication, with experience owning features end-to-end from technical implementation to deployment. Additional experience includes machine learning integration, Linux, and networking.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, PHP, HTML/CSS
- **Frontend:** Next.js, React, React Native, Tailwind CSS, shadcn/ui, Framer Motion, PWAs
- **Backend & Databases:** Node.js, Express.js, Supabase, Firebase, PostgreSQL
- **Data & AI:** Python, NumPy, Pandas, TensorFlow, Scikit-learn, Power BI
- **Automation & APIs:** n8n, Zapier, Make.com, HubSpot CRM, Telegram API, OAuth2, JSON Webhooks
- **Systems & Security:** Linux, Docker, WSL2, DNS troubleshooting, JWT authentication, RBAC

PROFESSIONAL EXPERIENCE

Mobile & Frontend Engineer | AwoofHub

April 2026 – Present · Abuja, Nigeria · Stack: React Native, Expo, Next.js

- Translated UI/UX designs into reusable, production-ready components for both the mobile app and marketing website, maintaining strict adherence to the design system
- Built custom hooks, TypeScript types, and service layers powering data flow across the app and website; integrated REST APIs with the backend team
- Shipped the product's marketing website from design handoff to launch, contributing to both frontend implementation and structure
- Collaborated directly with the team lead and founder on architecture decisions, product direction, and design strategy

Software Engineer Intern | NASRDA (National Space Research & Development Agency)

April 2025 – September 2025 · Abuja, Nigeria

- Built hands-on networking skills using WSL2, Docker, and virtual machines — configuring DNS resolution, static IPs, and protocol troubleshooting (dig, nslookup, traceroute)
- Developed a lightweight internal dashboard using Power BI to visualize processing status for a housing dataset (Mexico real estate data, sourced from Kaggle)
- Secured API endpoints with token-based authentication (JWT) and applied cybersecurity fundamentals — including access control and secure data handling — to user authentication flows, implementing role-based access control (RBAC) for admin vs. regular users
- Collaborated across data science, embedded systems, and networking teams in a multidisciplinary aerospace research environment

Frontend Engineer Intern | MyItura

January 2024 – June 2024 · Abuja, Nigeria · Stack: React, Next.js, HTML, CSS, JavaScript

- Built and maintained production frontend features using React and Next.js, optimizing component load times
- Contributed to a healthcare platform for managing patient consultations and prescriptions
- Collaborated within an agile team, participating in sprint planning and daily standups
- Completed 50+ tickets within the first two months of hire, demonstrating fast ramp-up and consistent delivery velocity

Fullstack & Automation Freelancer | Fiverr / Contracts

2023 – Present · Remote

- Delivered 30+ client projects spanning custom web architecture, automation pipelines, and conversion funnels

- Engineered lead-generation funnels and CRM integrations using GoHighLevel, n8n, and Zapier
- Designed and launched responsive websites for international clients using custom code, WordPress, and Wix
- Managed end-to-end client delivery independently, from initial wireframes to final production deployment
- Built websites optimized for Core Web Vitals, minimizing load times and improving performance scores
- Conducted SEO audits using PageSpeed Insights, identifying and resolving performance bottlenecks

EDUCATION

B.Sc. Computer Science | University of Abuja

2022 – 2026

CERTIFICATIONS

- Fullstack Web Development · EarlyCode (Oct 2022 – Feb 2023)
- App Development · EarlyCode (Jul – Sep 2023)
- Python Programming · EarlyCode (May – Jun 2022)

SELECTED PROJECTS

TyphoidGuard (*Next.js, TypeScript, TensorFlow, Scikit-learn*)

Zero-dependency, edge-inference clinical triage tool running a custom neural network client-side, achieving 98% prediction accuracy with no server round-trips.

Customer Onboarding Automation (*n8n, HubSpot CRM, Telegram API, JSON Webhooks*)

Automated CRM synchronization pipeline that validates incoming webhooks, maps contact data into HubSpot, and delivers a staged onboarding sequence.

FitTrack PWA (*Next.js 15, PWA, WebRTC, Workbox*)

Offline-first fitness tracking app featuring live barcode scanning via WebRTC, accelerometer-based step tracking, and cached API data for low-connectivity use.
